

Phase 8: Project Demonstration

This section demonstrates the Smart Lender application running end-to-end. Note: this page is a ready-to-fill template — please insert your own screenshots (taken after running the app on your machine) in place of each placeholder box below before adding this file to the repository.

Terminal Execution

Insert a screenshot of the terminal showing `train.py` running successfully (model comparison + accuracy output) and `app.py` starting the Flask server (e.g., "Running on http://127.0.0.1:5000").

[Insert terminal screenshot here — train.py / app.py output]

Web Interface

Insert screenshots of the running web application, showing the applicant details form and the prediction result screen for both an Approved and a Rejected case.

[Insert screenshot here — Loan application form]

[Insert screenshot here — Prediction result (Approved case)]

[Insert screenshot here — Prediction result (Rejected case)]

Demo Video Link

Record a short (2–3 minute) screen walkthrough showing the application being run from the terminal and used in the browser, upload it (e.g., to Google Drive or YouTube as Unlisted), and paste the link below.
